BrightPath Tech LLP

Proposal in response to **MRG-RFP-2026-014**: Omnichannel Customer Service & Ticketing Platform
Submitted to: Meridian Retail Group (fictional)
Submission date: 2026-09-25 | Proposal validity: 60 days
Contact: Sneha Kulkarni, Founder & CEO (sneha@brightpath.example)

Synthetic document created for a classroom exercise. All companies, people, clients and figures are fictional.

1. Executive Summary

BrightPath Tech is a fast-growing start-up founded in 2023. We understand Meridian wants to move away from email-only support to a modern omnichannel helpdesk. We offer the **lowest-cost and fastest** route: our SaaS product **HelpLoop** can be live in **10 weeks**, saving you months of effort and lakhs of rupees.

2. Proposed Solution

HelpLoop is a multi-tenant SaaS helpdesk with email, chat and WhatsApp in one inbox. Voice callback is on our roadmap for Q2 2027; in the interim agents can log calls manually.

- Pre-built Salesforce app available on AppExchange (basic contact sync).
- SAP S/4HANA: we will build a custom REST integration during the project. Specific approach to be finalised after discovery.
- Hosted on a public cloud; region selection to be confirmed.
- Supports 'hundreds of agents'; our largest current customer has 85 agents.

3. Implementation Approach and Timeline

We use an agile, sprint-based approach with two-week sprints and a lean team.

Sprint	Weeks	Scope
Sprint 1	1-2	Setup, email and chat
Sprint 2	3-4	WhatsApp, Salesforce app
Sprint 3	5-6	SAP integration (custom)
Sprint 4	7-8	Testing and training
Go-live	9-10	Cutover

Team: 1 project lead (also acts as solution architect), 2 developers, 1 support engineer (4 FTE). Data migration of legacy tickets is not included; historical tickets can be exported to CSV for reference.

4. Commercial Proposal

Item	Basis	Amount (INR)
HelpLoop licence (350 agents)	Rs 950 per agent/month x 12	39,90,000
Implementation services	Fixed price	12,00,000
Standard support	Included	0
Total Year 1		**51,90,000**

Assumptions: prices exclude GST; festive-season additional agents billed at the same rate pro-rata; WhatsApp charges extra; SAP integration scope capped at 3 APIs, beyond which change requests apply at Rs 6,500 per developer-hour. Year 2 pricing subject to revision.

5. Security and Compliance

We take security seriously. HelpLoop uses HTTPS and encrypted databases, and we follow industry best practices. We are planning to begin ISO 27001 certification in 2027. We will cooperate with Meridian on DPDP requirements as they are clarified. Backups are taken daily.

Risks: tight timeline depends on fast decisions from Meridian; SAP integration complexity is not yet known.

6. Support and Experience

Support is available Monday to Saturday, 9 am to 7 pm IST by email and chat. Target first response for critical issues is 4 business hours. Uptime target 99.5%.

BrightPath has 11 customers, mostly D2C brands with 10-85 agents. This would be our first deployment with SAP and our largest deployment to date.

- **UrbanSip Beverages** (fictional) - 22 agents, live 2025.
- **Leafy Home** (fictional) - 85 agents, live 2026.
