NexaWorks Solutions Ltd.

Proposal in response to **MRG-RFP-2026-014**: Omnichannel Customer Service & Ticketing Platform
Submitted to: Meridian Retail Group (fictional)
Submission date: 2026-09-22 | Proposal validity: 90 days
Contact: Arvind Iyer, Head of Pre-sales (arvind.iyer@nexaworks.example)

Synthetic document created for a classroom exercise. All companies, people, clients and figures are fictional.

1. Executive Summary and Understanding of Requirement

Meridian Retail Group operates 140 stores and an e-commerce site across India and has issued MRG-RFP-2026-014 to replace its legacy email-based support desk with a cloud omnichannel platform covering email, web chat, WhatsApp and voice callback. Key requirements are integration with the existing SAP S/4HANA order system and Salesforce loyalty CRM, support for 350 agents (peak 600 in festive season), go-live within 6 months, data residency in India, and DPDP Act 2023 compliance.

NexaWorks proposes **NexaDesk**, a proven cloud contact-centre suite, delivered through a structured, low-risk implementation and backed by a local 24x7 support centre in Pune. Our proposal is balanced: competitive pricing, solid security credentials and a plan designed to absorb delays without moving go-live.

2. Proposed Solution

- Cloud SaaS hosted on Microsoft Azure Central India with DR in South India; all data resident in India.
- Channels: email, web chat, WhatsApp, voice callback (native CPaaS integration).
- SAP S/4HANA integration through SAP Integration Suite using standard order and returns APIs; pre-built adapter used at two prior clients.
- Salesforce integration via managed package: loyalty tier, case history and NPS synced every 60 seconds.
- Validated capacity: 800 concurrent agents in production at an existing client.

3. Implementation Plan

Delivery uses a hybrid waterfall-agile model with formal stage gates, a joint steering committee meeting every two weeks, and RAID logs shared weekly. Total duration **22 weeks** including **2 weeks of built-in contingency**, so the plan absorbs slippage without breaching the 6-month deadline.

Phase / Milestone	Weeks	Exit criteria
P0 Mobilisation	1-2	Project charter, RACI, governance signed
P1 Discovery & design	3-5	Signed design; data migration mapping approved
P2 Build & configure	6-11	All channels configured; integrations unit-tested
P3 Data migration (3 trial loads)	8-13	Reconciliation at 99.9% record match
P4 SIT and UAT	12-16	Zero open Sev-1/Sev-2 defects
P5 Pilot in 15 stores + training	17-18	Pilot KPIs met; 350 agents trained
P6 Phased go-live (3 waves)	19-20	All stores live
Contingency buffer	21-22	Reserved for slippage
Hypercare	Go-live + 6 weeks	Stability sign-off

Team (14 FTE): engagement director, PMP-certified project manager, solution architect, SAP integration lead, Salesforce consultant, 3 configuration engineers, data migration lead, 2 QA engineers, OCM/training lead, 2 support transition engineers. Key personnel CVs in Annex B; named staff will not be replaced without Meridian's approval.

Risk plan: top risks (SAP sandbox availability, migration data quality, festive freeze window from October) each have an owner, trigger and mitigation; go-live is scheduled before the festive freeze.

4. Commercial Proposal

Item	Basis	Amount (INR)
NexaDesk licence (350 agents)	Rs 1,750 per agent/month x 12	73,50,000
Festive burst (250 agents x 3 months)	Rs 1,400 per agent/month (discounted)	10,50,000
Implementation (fixed price)	Milestone-linked payments	58,00,000
Data migration (3 trial loads)	Fixed price	9,00,000
24x7 support and success management	Annual	12,00,000
Total Year 1		**1,63,00,000**
Year 2 and 3 (each)	Licences + burst + support, 4% uplift cap	**99,84,000**

Assumptions: excludes GST; 20% of implementation fee withheld until hypercare sign-off; WhatsApp and telephony usage at pass-through cost. Three-year TCO approximately Rs 3.63 crore.

5. Security and Compliance

- ISO/IEC 27001:2022 certified; SOC 2 Type II report (2025) available.
- AES-256 encryption at rest, TLS 1.2+ in transit; SSO via SAML 2.0; MFA enforced for admins.
- DPDP Act 2023 controls: consent records, data principal rights requests, retention policies.
- Annual third-party penetration test; audit logs retained 3 years (extendable).

6. Support Model, Experience and References

Support: 24x7 multilingual service desk (English, Hindi, Marathi, Tamil) in Pune; P1 response 15 minutes, P1 resolution 4 hours, P2 resolution 8 hours; 99.9% uptime SLA with service credits; named Customer Success Manager with quarterly business reviews; monthly release notes and admin training; 6-week hypercare with on-site presence in week 1.

Experience: 14 contact-centre deployments since 2017, 5 in retail.

- **Sahyadri Supermarkets** (fictional) - 500 agents, SAP S/4HANA, live 2023.
- **TrendKart Online** (fictional) - 800 agents peak, Salesforce, live 2024.
- **Coastal Home Appliances** (fictional) - 180 agents, live 2025.
- Reference contacts for all three provided in Annex C.
